DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 29-84 rejected under 35 U.S.C. 102(b) as being anticipated by Young (US 6,058,843).

With regard to claims 29-84, Young teaches either explicitly or inherently all of the claimed circuitry, which is evidenced by the fact that Young discloses a machine adapted to print an image on the surface of an edible substrate. The printing machine includes a inkjet printer head assembly and containment means for containing the liquid food colorant (edible ink), a surface for supporting the edible substrate and means for movement between the surface and the inkjet print heads (please note: col 2, line1 – col 3, line 30).
